Ready for change

Coach says recruiting key to next year

By **KEN IRVING**
Student Reporter

Why would a former NFL and Division I Rose Bowl champion coach come to Alva to lead the NWOSU Rangers football team? "There's nothing more than I would love to do than bring my alma mater back to its winning ways," said NWOSU head football Coach Ronnie Jones, during an interview with news reporting students on Friday.

Jones has had stints in the NFL with teams such as the Philadelphia Eagles and Arizona Cardinals. He won the Rose Bowl with the Arizona State Sun Devils.

He has coached at the pinnacle of sports, but he chose to come to his alma mater for his last years coaching.

"I love the challenge," Jones said. "It's different than any other job because I have ties here. It's a chance to give back."

Jones could have chosen retirement, but instead he decided to coach one of the worst programs in Division 2 football.

"I think this is going to be the best coaching staff I have ever worked with..."

— **RONNIE JONES**

Since joining the Great American Conference in Division 2 NCAA football in 2011, the NWOSU Rangers have never had a winning season.

NWOSU Athletics

Head Coach Ronnie Jones talks to players after win against Southwestern Oklahoma State University.

The Rangers went 1-10 before Jones' arrival and repeated it under his first year at the helm.

Jones first year was not a Cinderella story. It was tough and a grind.

However, he said this year would be different because he finally has a chance to recruit his own players. Jones took the NWOSU job in December 2022 and arrived on campus in January 2023.

He did not have a chance to recruit his own players last year, but this year will be different.

"In changing a program, you have to bring football players we feel like we can win games with," Jones said. "I inherited good football players, but I just didn't have enough good football players."

Jones recruited 11 transfers

and signed a massive 40 high school players in the 2024 signing class.

He stressed recruiting is the absolute most important thing in college football. He said that if a coach cannot recruit then that coach could not be on Jones' staff.

In addition, he wants to change the coach's mindset in recruiting players.

"In the past it was almost like we took players that we could get," Jones said.

Jones said he wants to stay away from the notion that NWOSU has to recruit players that no one else recruited.

He said they could recruit with anybody in the state of Oklahoma.

Jones recruiting skills does not just stop with players.

He said his best recruiting job was hiring former NFL head coach Jerry Glanville as his defensive coordinator.

"He's one of the best defensive coaches of all time," Jones said. "His scheme is unlike any other that I've seen. [Glanville] told me I'm a great coach with a great defensive scheme already, but I had to tell him 'I know, but I need you to come coach for me.'"

Jones made his best sales pitch and with a little bit of encouragement he was able to sign Glanville as his defensive coordinator.

With Glanville at his side and a group of young ambitious coaches, this is the most excited Jones said he has ever been for a season.

Faith Simpson shooting a free throw during GAC Tournament.

Simpson named Northwestern's first All-American

By **LUCIA BARRANTES VEGA**
Sports Reporter

On Tuesday Faith Simpson was named to the All-American First Team honors for the D2CCA.

With this she becomes the first Lady Rangers basketball player and also first Northwestern player to earn First Team All-American in the Division II era.

Simpson was one of two Great American Conference players to earn All-American as Hannah Giddey from Southern Nazarene earned honorable mention All-American.

In her last season she earned All-Central Region Player of the Year, Central Region First Team, GAC Player of the Year and GAC All-Conference First Team.

During the 2023-2024 season she also added 6x GAC player of the week, D2CIDA National Player of the Week, led the conference in scoring, top 3 in the nation in PPG, first in field goals made and top three in all of DI and DII.

Simpson also scored 1000 points in her two seasons at NWOSU.

- Bible Chair Devotional Night at 8 p.m.

3rd Wednesday

- Free lunch at the BCM
- Meet the candidate night at 7 p.m. in the Ranger Room
- BCM Bible Study at 8 p.m.

Football:

Coach excited for next season

Continued from Page 1

"I think this is going to be the best coaching staff I have ever worked with," Jones said. "I feel great with the coaching staff we have right now. ... I believe we are all on the same page on what we are trying to accomplish. We have one focus, and we're all here for the same reason, and that's to turn this program around."

Jones has been around elite coaches during his tenure in the NFL and Division I level, but he said this is going to be the best coaching staff that he has had. He said he is more connected with them since they are at a smaller school. He feels like he can understand them and get to know them more. He has a personal connection with them, and that is important to him.

While Jones stressed the importance of recruiting and his coaching staff, he said the players are the most important thing to the program. He wants to get closer with his players. He has them come into the office before their first class each day, so he knows that they are up and he can say hello to them.

While he is feeling affectionate for his players off the field, on the field he said he is as tough as nails.

"We set our standards higher as a football team and also in recruiting," Jones said.

Last week in one of the teams hard running days Jones told them that he was not going to compromise this year. Last year if they could not run down and back

across the field, two times under 45 seconds then he would bump the time up to 50 seconds. This year, he is not budging.

"The players have to adjust, or they just won't play for us," Jones said.

Jones is not making the Rangers conditioning easy this season. He has increased the intensity of workouts and increased the number of times the Rangers are running this year. He wants all his athletes to be in shape this year.

Jones is currently 68 years old and has been coaching for 46 years. He has already coached and won at the highest level. He travels to and from Dallas when he can to see his wife who lives there. He could sit back, kick his legs up, retire and watch the sunset; but he will not.

"A season like what we just went through drives me because I'm not about to quit," Jones said. "When I finally walk away from this job, I promise the program will be in good shape. I'm not leaving till it is. This will be my last coaching job. ... When I walk, away people are going to be proud of this program and the success that we're having."

OPINION

Royal rumors run rampant

By CHLOE GRUSING
Editorial Editor

This past month has been a
wild time on the internet.

Kate Middleton, the Princess
of Wales, has been the center of
hundreds of conspiracy theories
throughout the month of March.
The public has been speculat-
ing where she is, as she has not
been seen publicly since this past
Christmas.

Due to harsh criticism and
public pressure, Middleton re-
leased a photoshopped image that
left the public even more con-
fused. The speculation continued
to grow about her whereabouts
and the palace then followed with
a video message from Middleton
stating that she has cancer.

The public is still left with
many questions and theories as
to what the truth is. Many folks
are worried about the safety and
wellbeing of the princess.

What sparked these rumors
and theories to start? Let's look
back at the past few months and
piece together what information
has been given.

On Dec. 25, Middleton made
her last public appearance for
Christmas. Shortly after this an-
nouncement on Jan. 17, the pal-
ace announced to the public Mid-
dleton would be undergoing a
planned abdominal surgery.

The announcement did not
give any detail as to what the
procedure was, just that it was
planned.

Middleton returned home for
the London Clinic on Jan. 29
and began her recovery process.
There are no photos of her leav-
ing the hospital, many assume
this is for privacy reasons.

The end of February is when
the conspiracy theories began.

Prince William pulled out of a

memorial service due to personal
reasons, and the public assumed
this was because Middleton was
experiencing health issues. Peo-
ple began to worry about the
princess, and the palace released
another statement stating Middle-
ton was doing well. However, this
vague statement caused the public
to speculate Middleton's where-
abouts, as she had not been seen
publicly in weeks. The rumors
included botched surgery, divorce
and even the death of Middleton.

On March 4 a paparazzi photo
of Middleton and her mother was
taken, but the image was poor
quality and did not look like the
princess, according to her follow-
ers. The image only fueled the
rumor mill and caused the whole
internet to begin worrying about
the princess's wellbeing.

The height of the frenzy began
on March 10, when Kate released
a poorly photoshopped image for
Mother's Day in the UK. The im-
age had clear signs of photoshop
or AI use, with her children's fin-
gers being crossed and broken
looking along with cut lines in
the clothes.

The picture released was so
poorly edited the Associated
Press had to release a kill state-

ment saying the photo was not
real.

The rumors began to run wild
online, with the public ultimate-
ly believing Prince William was
cheating or somehow involved in
covering up Middleton's death. I
personally felt compelled to be-
lieve the conspiracy theories, as
the photoshop was so shotty. I am
confused on how such a highly
regarded institution could have
such a slip up.

Damage control began shortly
after the photo was released, with
Middleton stating she edited the
photo herself. This was not be-
lieved by the public whatsoever,
and only left people more con-
fused.

The next major event to hap-
pen in this saga was on March
18 when William and Kate were
spotted shopping. This however
did not help the royals' case, as
most people believed "Kate" was
actually a body double.

The public would not get a
sufficient answer until March 22,
when Middleton released a video
sharing that she has cancer.

In the video the princess
thanks the public for their con-
cern and states doctors found can-
cer while performing the planned

surgery. She said she has been
recovering privately and asked
for time and respect while she re-
covered.

While some people believed
the statement, many people still
believe the video was fake. Some
accounts on X, formerly Twitter,
have claimed the background
moves at a weird angle, her facial
expressions look unnatural, and
the shirt she is wearing was also
worn in 2016. The public began
to worry about the validity of this
statement and began to analyze
the video.

I do believe most people think
the palace is doing some shady
things. Why would they release
such a poorly photoshopped pic-
ture? Why was William not pres-
ent in the video? Is the princess
safe?

These are the questions I was
left with after watching these
events unfold. It is suspicious the
way the palace handled the situa-
tion. I believe that Middleton has
cancer, but the events leading up
to the announcement make me
suspicious. The rumors may have
some truth to them, but the public
will most likely never get the an-
swers they are searching for.

The palace is known to have
a checkered past, like their treat-
ment of Princess Diana. People
who supported Diana still believe
Buckingham had something to do
with her death.

However, there has been no
concrete evidence to prove this
rumor, so therefore, it remains a
rumor. The public will most like-
ly never know the secrets of the
royal family so rumors and gossip
are inevitable. I hope the princess
recovers and is healthy, not only
for her duties but also for her
family. My main concern is the
children in this situation.

I wish Middleton nothing but a
speedy recovery.

Lawsuit creating conversation

By NOAH PRIDE
Guest Coloumist

Recently, Apple was hit with an antitrust
lawsuit.

This has raised questions about whether
Apple is running a monopoly as well as ques-
tions about ownership over digital goods. A
lesser talked about part of this broader con-
versation is the Right to Repair.

The Right to Repair is an odd thing to talk
about. It's basically what it says on the tin. It's
the customer's right to repair a product they
own. This is obvious for most things. You can
put whatever parts you want on your car or in
a computer.

But some companies have famously
pushed very hard against this. The two most
famous are Apple and John Deere.

John Deere was infamous for not allowing
farmers to use third party products to repair
their tractors and other vehicles. John Deere

did this by using software lock.

Only John Deere approved technicians
could unlock it. This practice led to an on-
going class action lawsuit over the Right to
Repair. The allegation is that John Deere had
a monopoly on the service tools their products
needed. Apple went another route.

Apple products are designed to be hard
to repair. One method is using non-standard
screws on the phone. Another is to make the
inner workings on the phone all one modular.
This makes it hard to replace just one part. Ip-
hone parts also react badly to being swapped
in and out.

So, why do companies do this? Pro Right
to Repair advocates might call them greedy
and just wanting to control the consumer, but
what reasons do these companies give for
their practices?

One reason is that companies don't want
to deal with third party parts. If a third par-
ty has malware or goes cataclysmic wrong,
Lithium-ion batteries can explode and Apple

doesn't want their brands associated with ex-
ploding phones.

It will do so with the company's brand
all over it. Another reason is that companies
don't want their designs to be poked around
in. For instance, if your company had a special
technology that made it take 50% less power,
you wouldn't want competitors to reverse-en-
gine your edge on the market.

As things stand now, Things are slowly go-
ing to the Pro Right to Repair side. States are
passing the Right to Repair legislature. Last
year, Joe Biden signed an executive order that
was in the favor of the Right to Repair.

The lawsuit to John Deere was allowed to
continue last year. Two years ago, Apple soft-
ened their stance with their Self Service Re-
pair program.

The Anti Right to Repair side is, howev-
er, still lobbying and fighting against the Pro
side. All in all, the Right to Repair is still be-
ing fought over and the fight doesn't seem to
be ending soon.

Celebrating Easter as a Catholic

Well, Easter is just around the corner, and Dr. Armstrong has asked me to write about the holiday from the point of view of a Catholic after finding out my family heritage.

**WORDS
WITH MR.
KAUMANS**

KEVIN
KAUMANS

Now, while I haven't been to church in a good long while, I am very knowledgeable about the traditions involving the Roman Catholic Church. So, in this episode of Words With

Mr. Kaumans, I'm going to be going over what Easter means to us.

First off, we have this thing called "Lent Fridays." This takes place a few weeks before Easter, where us Catholics abstain from eating meat of any kind (excluding fish). This is because of Jesus's fasting during his journey across the desert. We honor this sacrifice by following in his footsteps.

Second, we pray to the Virgin Mary. Now, in many Christian denominations, prayer means to worship. However, to us Catholics, it only means "to talk to." It's quite hard for me to explain, but to put it into simpler terms, think of it like calling a dead relative's phone number. It's not the same as making music dedicated to worshipping their very existence as one would with God.

Sacred Heart Holy Week Events in Alva

- Holy Thursday mass, 6:30 p.m.
- Good Friday Stations of the Cross, 3 p.m.
- Good Friday Passion of the Lord service, 6:30 pm.
- Holy Saturday Easter vigil mass 8:30 p.m.
- Easter Sunday mass 9 a.m.

University Relations

Multiple NWOSU Esports teams participate in a tournament on campus.

Esports team to host summer camp 2024

By **ALLI SCHIEBER**
Editor-in-Chief

The NWOSU Esports Team is hosting their second summer camp for high schools.

The camp is sponsored by the Northwestern Computer Science program and Esports team and is funded by the Buckles and Tucker Endowments. The camp is open to all high school students entering grades 9-12 in the fall and will be from June 3-5th. The camp will have individual practice and a tournament plan which will be led by the NWOSU Esports Team.

Students can register for individual days or all three days of the camp. Lunch will be provided for the students and if staying all three days they can stay in the dorms. The camp costs \$25 a day, \$75 a day without staying in the dorms or \$100 if staying in the dorms. The cost will be for lunch

and a T-shirt.

The deadline for high school students to apply is April 15.

Each day the campers will be able to play and learn more about a different game. The first day, June 3, the game will be "Overwatch 2." The second day will be "Rocket League," and the third day will be "Super Smash Brothers Ultimate."

Esports is basically competitive video games. The Northwestern team competes in games like "Call of Duty," "League of Legends," "Valorant", and more. Including, of course, the three they will be playing during the camp.

Esports also offer scholarships. If you are interested in learning more about NWOSU Esports you can contact Evan Vaverka at esports@nwosu.edu or epvaverka@nwosu.edu.

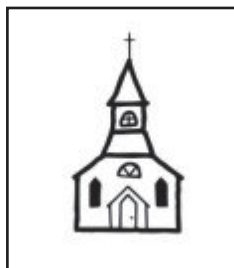

For more information about the camp, you can contact Dr. Tim Maharry at tjmaharry@nwosu.edu.

Joke of the week:

Did you hear about the guy who drank invisible ink? He's waiting in the hospital to be seen.

Curious about Ramadan? Learn about this month

By **KATELYN FINDLEY**
Features Editor

This year on Sunday, March 11, Ramadan—the month of fasting for Muslims—began and will end on Monday, April 8.

Ramadan takes place during the time Muhammad received the first verses of the Quran in 610 CE (common era). Muslims believe the Quran is a holy book that contains the revelation from God.

Ramadan does not have a set date. Islamic calendar follows the literal cycles of the moon, and each month only begins when the new moon is sighted.

Ramadan starts when the new moon is sighted that month. Because they rely on the shifting of the moon, the date for Ramadan moves with the rotation.

The start day is different for everyone. The people rely on the moon to tell them when the start of Ramadan starts. The location of a person's changes when they can view the new moon thus moving the start date.

The Islamic people have a calculated date to estimate when the new moon will rise. Some choose to follow the calculated

date strictly. Some choose to use a mixture of the new moon and the calculated date rather than relying solely on the new moon or solely on the calculated date.

The start and end is represented with a meal. To begin the month of fasting, a special predawn meal called Suhoor is enjoyed before starting the daily fasting. To close the month, they partake in a sundown meal called Iftar that symbolizes the end.

Each day of the fast, Muslims abstain from food, drink and sexual relations during daylight, eating before sunrise and after sunset.

Where did Ramadan begin?

Ramadan took place in the seventh century around 624 CE. It originated in the city of Medina located today in Saudi Arabia.

Does everyone fast for the full month?

The fasting that takes place during this month is required except for special circumstances.

Those who are ill, pregnant, traveling elderly, and during a woman's menstruation are exempt. However, those who are excused make up these days during the year. You can incorporate it into different weeks or fast them altogether.

Track, field teams set 3 first places

The Northwestern Oklahoma State University track and field teams traveled this weekend for their first outdoor meet of the season. Men's Track opened the season in San Marcos, Texas. The meet hosted by Texas State University, is the Rangers first meet since 1996.

Junior Ben Morfin led the 1500-Meter placing first with a time of 4:06.90.

The freshman Trevor Montayne earned the Co-Track GAC Athlete of the week.

Montayne ran on two relays that set school records. The 400-meter relay time of 42.08 seconds. The 1600-meter time

of 3:22.26. Individually, he ran a 10.84 in the 100 and a 21.35 in the 200. He ranks second in the GAC in the 200 with the fifth-fastest time amongst freshmen.

Next meet will be at Emporia State University on Thursday.

Additionally, these are the top performers in some of the events the rangers competed.

- 400-Meter Hurdles**
- 3. Jayden Geathers, 58.15.
- 800-Meter**
- 6. Christian Franklin, 1:56.03 PR
- 1500-Meter**
- 5. Crispus Atukwase, 4:09.70
- 5000-Meter**
- 6. Salat Ibrahim, 15:50.70 PR
- 4x100-Meter Relay**

6. K. Moore, K. Bogdan, D. Taylor, T. Montayne, 42.08 seconds

4x400-Meter Relay

4. K. Moore, W. Hall, M. Byers, T. Montayne, 3:22.26

Javelin Throw

5. Connor Miers, 22.53m

The Lady Rangers traveled all the way to Arkansas City, Kansas They competed at the Mark Phillips Tiger Open hosted by Cowley College.

They won first place in two events. The 4x400 meter relay competed by Tavonyia Lacy, Diamond Hilton, Brianna Brantley, and Renaja Engermann, they set a time of 4:18.32.

The 4x800 meter relay was

ran in 11:08.89 by Cadence Long-Torres, Asia Williams, Harley Woody and Jasmin Garcia.

The Lady Ranger's next meet will be this weekend at Oklahoma Baptist University.

These are some of the best results for the Lady Rangers.

- 5000-Meter Run**
- 3. Cadence Long-Torres, 19:59.03
- 4. Asia Williams, 20:03.69
- 4x100-Meter Relay**
- 3. Shackera Douglas, Brianna Brantley, Diamond Hilton, Darianne Thompson, 48.03
- 400-Meter Hurdles**
- 6. Gina Wilson, 1:13.23
- Long Jump**
- 4. Darianne Thompson, 5.16m

CAMPUS LIFE

Mr. Northwestern returns to campus

Photos by Derrick Galindo

Jameson Hale does an impressive toe touch during the fitness portion of Mr. Northwestern on March 14.

Mr. Northwestern is a pageant that mimics the Miss Northwestern competition but is for the guys on Northwesterns campus. This was a tradition that people enjoyed but has not been on campus for many years...until now.

Jameson Hale won this year's Mr. Northwestern competition on March 14. He sang for his talent.

The annual Rangers Got Talent was also on March 14 and many students showed off their talents in between the different categories of Mr. Northwestern

The Rangers Gor Talent winner was Norah Scarbrough.

Freshman, Norah Scarbrough mimics "Napoleon Dynamite" dance for Rangers got Talent on Thursday, March 14.

Outdoor classroom

Photo by Alli Schieber

Work on the outdoor classroom located between the science building and student center began over spring break.

Celebrating Pi Day with pie

Photo by Kayleigh Rauch

Faculty and students talk about the pies they like and want to try, before trying each others favorites.

Author visits campus

Photo by Malcolm Smith

Author Gene Kwak does a presentation of his book, "Go Home, Ricky!" on Wednesday, March 13.

Northwestern employees set out pies for students and staff to come in and try. As a way to celebrate national Pi day on March 14.
